

Potgrond mixes

Seed mix

When creating a seed mix, it's important to keep structure in mind. The medium does not need to be full of nutrients, but should have a fine, open texture for seed germination. The Berryfields seed mix is made up of:

- 2 parts leaf mould
- 1 part sieved loam
- 1 part garden compost
- 1 part sand or fine grade grit

Pricking out mix

Seedlings should be given a more nutrient-based compost for an extra boost. The Berryfields pricking out mix is made up of:

- 1 part garden compost
- 1 part loam
- 1 part leaf mould
- 1 part sand or grit

Potting mix

Long-term potting mixtures should carry a lot of nutrients to help the plant over the course of its life. The Berryfields potting mix is made up of:

- 2 parts sieved garden compost
- 1 part leaf mould
- 1 part loam
- 1 part sand or grit
